230 - 80
Bridging boundaries
by counting back in efficient steps

$$230 - 30 - 50 = 150$$

304 - 297
Find the difference between two numbers

304 is 7 more than 297
297 is 7 less than 304
so the difference between them is 7

Unit fractions have a numerator of 1

If the denominator is 5 there are 5 equal parts.

If the denominator is 8 there are 8 equal parts.

Non-unit fractions have a numerator greater than 1

The numerator is 2 so two out of 3 equal parts are shaded.

When the denominators are the same, the larger the numerator, the larger the fraction.

When numerators are the same, the larger the denominator the smaller the fraction.

$$\frac{2}{3} = \frac{4}{6} = \frac{6}{9}$$

$$\frac{4}{6}$$

If there are 2 times as many equal parts, then there are 2 times as many shaded parts

$$\frac{6}{9}$$

If there are 3 times as many equal parts, then there are 3 times as many shaded parts
